PREFACE

THIS part of the *Catalog of Copyright Entries* contains a list of the domestic and foreign works registered in the Copyright Office in Classes G, H, I, J, and K from January 1, 1952, through June 30, 1952. Included also are selected books in the fields of art and photography, and greeting cards registered in all classes. Renewal registrations in these classes made in this period are listed in the second section of this catalog. Commercial prints and labels, which are registered in Class K under the symbol KK, are listed in Part 11B.

Arrangement.—This catalog is divided into three sections. The first section consists of complete entries for works currently registered as works of art, reproductions of works of art, scientific and technical drawings, photographic works, and prints and pictorial illustrations. It includes published and unpublished original paintings; drawings; designs for works of art; three-dimensional works of art; charts; architectural and engineering plans and mechanical drawings; anatomical models and other plastic works; photographic prints; filmstrips; slide films; stereoscopic and other transparencies; published reproductions of existing works of art in the same or a different medium; and published prints and pictorial illustrations, including picture post cards, greeting cards, cartoons, and prints used for calendars, posters, etc. Entries are arranged alphabetically under the name of the author (artist, draftsman, photographer, etc., or employer in case of a work made for hire) or under title in the case of filmstrips. Included also are brief entries in the form

of cross-references from other names associated with the works, from variant forms of names, from distinctive titles, and from prominent scenes and events, cities and other specific geographic areas. Cross-references for filmstrips are made from other titles connected with the works and from authors and titles of the published literary works on which they were based, if known, and, in some instances, from the releasing agents, if different from the producers.

The second section, "Renewals," consists of an alphabetical list of works of art, scientific and technical drawings, photographic works, and prints and pictorial illustrations for which renewal copyrights were registered during the period covered by this catalog. Brief entries in the form of cross-references are included for renewal claimants, joint authors, and titles.

In the third section, "Selected Books in Art and Photography," are listed. These works are registered in Class A and appear also in Part 1A of the *Catalog*. They are arranged alphabetically under author and are books which consist largely or primarily of reproductions, books which list or describe photographs or works of art (including those devoted to the works of individual artists and photographers) and catalogs of exhibitions. For all the works listed in this section, printed Library of Congress cards are available. Orders for or inquiries regarding these cards should be addressed to the Card Division of the Library of Congress, Washington 25, D. C.

Bibliographic Data.—Under the heading each

main entry for works currently registered includes, as applicable 1) the title; 2) other essential names associated with the work; 3) the description of the pictorial content of the item; 4) the publisher and place of publication when the publisher and claimant are different (the place of publication is given in the statement of copyright facts when the claimant and the publisher are the same); 5) a brief statement describing the physical nature of the material; and 6) the series. For renewal entries, the main heading is the name of the author (artist, or employer in case of a work made for hire). The heading is followed by the title of the work.

The names of any authors listed in the application which do not appear elsewhere in the entry are given immediately preceding the copyright data after the statement, "Appl. author(s)." When an employer in the case of works made for hire is named in the application, his name is included in the entry, together with the name of the employees when given.

Copyright Data.—The portion of the entry giving the facts of copyright registration begins with the copyright symbol ©. For works currently registered the symbol is followed by 1) a brief description of the new matter on which copyright is claimed when such statement is made in the copyright application; 2) the name of copyright claimant if it differs from the name in the heading (when the copyright symbol follows the name of the author in the heading, it indicates that the author and copyright claimant are the same) and the place of publication when the claimant and publisher are the same; 3) for published works, the date of publication as given in the copyright application, which represents also the year date given in the copyright notice, unless the publication date is followed, in parentheses, by the statement "in notice" and a different year date for unpublished works, the date on which the last of all of the items required to complete registration (i. e., each of the following: copy, application, and fee) was received in the Copyright Office; and 4) the copyright registration number.

For renewals, the symbol is followed by 1) the original copyright date; 2) the registration number; 3) the renewal registration number; 4) the date of the receipt of the renewal application; 5) the name of the renewal claimant; and 6) an abbreviation in parentheses representing the applicant's statement

of the basis of his renewal claim—e. g., John Doe (NK) indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author. Information contained in the application or in the copy of the work itself which relates to the registration of an earlier version of the work is given in brief form at the end of the entry.

In the case of each entry the name of the copyright claimant is that given at the time of registration. Information relating to subsequent changes of ownership recorded in the Copyright Office can be ascertained upon request and upon payment of the statutory search fee to the Register of Copyrights.

Deposit of Copies.—In the case of every copyright entry listed in this part of the *Catalog of Copyright Entries*, except for renewal copyrights, the deposit of copies (or copy) as required by sections 12, 13 or 215 of Title 17 of the United States Code has been made.

Authority.—The *Catalog of Copyright Entries* is published by authority of sections 210 and 211 of Title 17 of the United States Code. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

Organization of the Catalog.—This issue of the *Catalog of Copyright Entries* is part of Volume 6 of the Third Series. The parts are numbered according to the alphabetical sequence of classes as listed in section 5 of Title 17 of the United States Code. Letters are added to the part numbers to indicate subdivisions.

The classes of material principally contained in each part are listed, together with their respective symbols, under the title of the part in the "Table of Organization," which faces the title page in this catalog. In each case, the first letter of the symbol is that of the class under which registration is made; the second, if any, is a designation added by the Copyright Office for purposes of statistical analysis of registrations. Foreign works for which two copies have been deposited, under section 215 of Title 17 of the United States Code are distinguished by a zero immediately following the symbol. The symbol R does not represent a class designated in the copyright law, but has been

adopted by the Copyright Office to distinguish renewal copyright registrations. Some parts also contain registrations made under symbols other than those listed for the particular part if the subject matter or type of material of these registrations is similar to that generally included.

Orders.—Orders for all parts of the *Catalog of Copyright Entries* should be sent directly to the Register of Copyrights, Library of Congress, Washington 25, D. C. Orders may be placed as follows: (1) as a subscription for a single year or to continue until further notice, or (2) as an order for individual issues. All orders should state clearly the title of the *Catalog* part and the inclusive dates of the issues

wanted. *Checks or money orders should be made payable to the Register of Copyrights.*

The price of each individual number of the *Catalog* is given in the "Table of Organization." The annual subscription rate for each part is twice the price of a single number, since all parts are issued semiannually. The complete *Catalog of Copyright Entries* may be secured on a subscription basis for \$20 a year.

Inquiries.—The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Please address communications of this nature to the Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.

- NORTH AFRICA IN FERMENT (Filmstrip)**
New York times, 1952. 59 fr., b&w, 35mm. (Report on the news, May 1952) Summary: Surveys the history, geography, and economic conditions of North Africa, an area dominantly populated by Arabs of the Moslem faith; discusses the tensions emanating from the nationalist insistence for greater political independence and Russia's desire to take over the strategic area. Describes the modern improvements and the relatively harsh French rule in French Morocco, Algeria, and Tunisia. © The New York Times Co.; 28Apr52; JP1289.

PREFACE

THIS part of the *Catalog of Copyright Entries* contains a list of the domestic and foreign works registered in the Copyright Office in Classes G, H, I, J, and K from July 1, 1952, through December 31, 1952. Included also are selected books in the fields of art and photography, and greeting cards registered in all classes. Renewal registrations in these classes made in this period are listed in the second section of this catalog. Commercial prints and labels, which are registered in Class K under the symbol KK, are listed in Part 11B.

Arrangement.—This catalog is divided into three sections. The first section consists of complete entries for works currently registered as works of art, reproductions of works of art, scientific and technical drawings, photographic works, and prints and pictorial illustrations. It includes published and unpublished original paintings; drawings; designs for works of art; three-dimensional works of art; charts; architectural and engineering plans and mechanical drawings; anatomical models and other plastic works; photographic prints; filmstrips; slide films; stereoscopic and other transparencies; published reproductions of existing works of art in the same or a different medium; and published prints and pictorial illustrations, including picture post cards, greeting cards, cartoons, and prints used for calendars, posters, etc. Entries are arranged alphabetically under the name of the author (artist, draftsman, photographer, etc., or employer in case of a work made for hire) or under title in the case of filmstrips. Included also are brief entries in the form of cross-references from other names associated with the works, from variant forms of names, from distinctive titles, and from prominent scenes and events,

cities and other specific geographic areas. Cross-references for filmstrips are made from other titles connected with the works and from authors and titles of the published literary works on which they were based, if known, and, in some instances, from the releasing agents, if different from the producers.

The second section, "Renewals," consists of an alphabetical list of works of art, scientific and technical drawings, photographic works, and prints and pictorial illustrations for which renewal copyrights were registered during the period covered by this catalog. Brief entries in the form of cross-references are included for renewal claimants, joint authors, and titles.

In the third section, "Selected Books in Art and Photography," are listed. These works are registered in Class A and appear also in Part 1A of the *Catalog*. They are arranged alphabetically under author and are books which consist largely or primarily of reproductions, books which list or describe photographs or works of art (including those devoted to the works of individual artists and photographers) and catalogs of exhibitions. For all the works listed in this section, printed Library of Congress cards are available. Orders for or inquiries regarding these cards should be addressed to the Card Division of the Library of Congress, Washington 25, D. C.

Bibliographic Data.—Under the heading each main entry for works currently registered includes, as applicable 1) the title; 2) other essential names associated with the work; 3) the description of the pictorial content of the item; 4) the publisher and place of publication when the publisher and claimant are different (the place of publication is given in the

statement of copyright facts when the claimant and the publisher are the same); 5) a brief statement describing the physical nature of the material; and 6) the series. For renewal entries, the main heading is the name of the author (artist, or employer in case of a work made for hire). The heading is followed by the title of the work.

The names of any authors listed in the application which do not appear elsewhere in the entry are given immediately preceding the copyright data after the statement, "Appl. author(s)." When an employer in the case of works made for hire is named in the application, his name is included in the entry, together with the name of the employees when given.

Copyright Data.—The portion of the entry giving the facts of copyright registration begins with the copyright symbol ©. For works currently registered the symbol is followed by 1) a brief description of the new matter on which copyright is claimed when such statement is made in the copyright application; 2) the name of copyright claimant if it differs from the name in the heading (when the copyright symbol follows the name of the author in the heading, it indicates that the author and copyright claimant are the same) and the place of publication when the claimant and publisher are the same; 3) for published works, the date of publication as given in the copyright application, which represents also the year date given in the copyright notice, unless the publication date is followed, in parentheses, by the statement "in notice" and a different year date, for unpublished works, the date on which the last of all of the items required to complete registration (i. e., each of the following: a copy, application, and fee) was received in the Copyright Office; and 4) the copyright registration number.

For renewals, the symbol is followed by 1) the original copyright date; 2) the registration number; 3) the renewal registration number; 4) the date of the receipt of the renewal application; 5) the name of the renewal claimant; and 6) an abbreviation in parentheses representing the applicant's statement of the basis of his renewal claim—e. g., John Doe (NK) indicates that renewal of copyright is claimed by John Doe as next of kin of the deceased author. Information contained in the application or in the copy of the work itself which relates to the registration of an earlier version of the work is given in brief form at the end of the entry.

In the case of each entry the name of the copyright claimant is that given at the time of registration. Information relating to subsequent changes of ownership recorded in the Copyright Office can be ascertained upon request and upon payment of the statutory search fee to the Register of Copyrights.

Deposit of Copies.—In the case of every copyright entry listed in this part of the *Catalog of Copyright Entries*, except for renewal copyrights, the deposit of copies (or copy) as required by sections 12, 13 or 215 of Title 17 of the United States Code has been made; or, in the case of published three-dimensional works of art, there has been a compliance with section 202.8 (b) of the regulations of the Copyright Office, published in the *Code of Federal Regulations, 1949 edition*.

Authority.—The *Catalog of Copyright Entries* is published by authority of sections 210 and 211 of Title 17 of the United States Code. Section 210 provides in part: "The current catalog of copyright entries and the index volumes herein provided for shall be admitted in any court as prima facie evidence of the facts stated therein as regards any copyright registration."

Organization of the Catalog.—This issue of the *Catalog of Copyright Entries* is part of Volume 6 of the Third Series. The parts are numbered according to the alphabetical sequence of classes as listed in section 5 of Title 17 of the United States Code. Letters are added to the part numbers to indicate subdivisions.

The classes of material principally contained in each part are listed, together with their respective symbols, under the title of the part in the "Table of Organization," which faces the title page in this catalog. In each case, the first letter of the symbol is that of the class under which registration is made; the second, if any, is a designation added by the Copyright Office for purposes of statistical analysis of registrations. Foreign works for which two copies have been deposited, under section 215 of Title 17 of the United States Code are distinguished by a zero immediately following the symbol. The symbol R does not represent a class designated in the copyright law, but has been adopted by the Copyright Office to distinguish renewal copyright registrations. Some parts also contain registrations made under symbols other than those listed for the particular part if the sub-

ject matter or type of material of these registrations is similar to that generally included.

Orders.—Orders for all parts of the *Catalog of Copyright Entries* should be sent directly to the *Register of Copyrights, Library of Congress, Washington 25, D. C.* Orders may be placed as follows: (1) as a subscription for a single year or to continue until further notice, or (2) as an order for individual issues. All orders should state clearly the title of the *Catalog* part and the inclusive dates of the issues wanted. *Checks or money orders should be made payable to the Register of Copyrights.*

The price of each individual number of the *Catalog* is given in the "Table of Organization." The annual subscription rate for each part is twice the price of a single number, since all parts are issued semiannually. The complete *Catalog of Copyright Entries* may be secured on a subscription basis for \$20 a year.

Inquiries.—The Copyright Office welcomes inquiries, suggestions, and comments on the content and organization of the *Catalog*. Please address communications of this nature to the *Chief of the Cataloging Division, Copyright Office, Library of Congress, Washington 25, D. C.*
